01. SUMMARY

I bring 12+ years of accounting and finance experience into analytics engineering, so the data models I build are audit-ready and speak the language of the business. As a Senior Data Analyst at Evermos I work with data engineers and cross-functional teams across the modern data stack (Snowflake, dbt, Airflow, SQL and Python).

My work spans dbt models and pipelines, a central warehouse and a trusted single source of truth (SSOT) for finance. I replace manual, error-prone processes with automation for journals, invoicing and audit data while setting the standards that make data reliable and teams faster. Beyond building the data, I turn analysis into clear recommendations at Evermos, from distributor and outlet tiering with forecasting to cash conversion cycle (CCC) analysis and targeted actions for top users in key segments. I also lead small data projects and have mentored 100+ aspiring analysts, an experience that shaped how I help people and teams grow.

02. EXPERIENCE

Evermos | Senior Data Analyst

Bandung, Hybrid | Apr 2026 – Present

Promoted from Data Analyst, Oct 2023 – Mar 2026

- **Data warehouse & modeling:** led migration of Finops data into the central data warehouse and built dbt models for the shipping, Ads Service, product sourcing and non-apps ledgers, used for both external audit and Finops.
- **Governance & data quality:** authored the Enterprise Bus Matrix proposal for the General Trade stream, with data-improvement opportunities; maintain Google Sheet conventions via Apps Script for manual stakeholder data sources, keeping ingestion stable with minimal errors.
- **Closing automation:** built a multi-stream journal automation that transforms salesbook data into submit-ready draft ledgers, estimated to cut month-end closing from 7 days to 3–4 days.
- **Process automation:** replaced the manual postpaid shipping-invoice process with an automation script, cutting each cycle from 3–4 days to 1 day, run by a single Finance PIC.
- **Finance SSOT:** built the trusted single source of truth for finance operations, unifying the reporting used by top management.
- **BI delivery:** delivered dashboards, analytics and reports for stakeholders and top management across Finance, General Trade, Ads Service and Shipping, covering account receivable tracking, outlet tiering, sell-in/sell-out, cash conversion cycle, margin tiering and winning products.
- **AI enablement:** enabled stakeholders from various departments to implement AI in their daily workflow; most recently presented at a company-wide AI Academy on context engineering.

RevoU | Data Analytics Mentor & Team Lead

Remote, Part-time | Aug 2022 – Feb 2025

- **Team Lead, Full Stack Data Analytics Program** (Aug 2022 – Feb 2025): guided cohorts of 12–20 students through simulations and 1-on-1 coaching on data cleaning, analysis and visualization; reviewed capstone projects and gave actionable feedback.
- **Vertical Mentor, RevoU x AWS Kampus Merdeka (CendekiAwan)** (Jan – Jun 2024) and **Data Analytics Mentor, RevoU x Kampus Merdeka** (Aug – Dec 2023): mentored students on cloud-based analytics solutions with AWS.
- **Data Analyst Associate, Virtual Labs** (Sep – Dec 2022): feature prioritization, customer segmentation, churn analysis and KPI monitoring for a stealth startup.

PT Murakabi Talenta Cala | Accounting Supervisor

Remote, Part-time | Mar 2018 – Present

- Supervise financial reporting, tax compliance and payroll; advise the Director on financial strategy and build operational dashboards for leadership decisions.

Koperasi Pegawai Indosat | Senior Accountant

Bandung, On-site | Jan 2012 – Feb 2022

- Managed financial reporting and reconciliation for the West Java region and advised regional leaders.
- Led migration of financial data from a local database to open-source ERP (Odoo), resolving complex accounting discrepancies.

Satgas Covid-19 Nasional | Data Administrator

Jakarta, Contract | Oct 2020 – Mar 2021

- Cleaned the user database of the BLC (Bersatu Lawan Covid) application; produced budget-realization reports, SOPs and flowcharts; supervised the field team.

03. SKILLS

Data Eng. & Modeling	Python, SQL, dbt, Apache Airflow, Snowflake, Docker, GitHub, AWS, PostgreSQL, MySQL, BigQuery, Dimensional Modeling (Bus Matrix)
BI & Automation	Metabase, Looker, Tableau, Excel, Power Query/Pivot, AppScript, n8n
Leadership & Governance	Data Governance, Stakeholder Management, Prioritization & Roadmapping, Mentoring, Project Leadership
Finance & Accounting	Financial Reporting, Closing & Journals, Audit Readiness, Tax, Budgeting & Forecasting, ERP Migration (Odoo)
AI Tools	ChatGPT, Claude, Gemini, NotebookLM

04. EDUCATION

Institut Teknologi Bandung
Master's, Industrial Engineering & Management (Enterprise Systems) (2013–2017)

Universitas Padjadjaran
Bachelor's, Accounting (2004–2009)

05. CERTIFICATIONS

SnowPro Associate: Platform Certification, Snowflake (2025)
Full Stack Data Analyst: RevoU (2022)
Fundamental SQL: DQLab (2022)
Brevet Pajak A & B: Tax Center Universitas Padjadjaran (2009)
